

# Introducing HRComply's new CovidComply Tracker and Management module

Here at HRComply we have been working hard to help our existing clients manage their employee resources and risks during these unprecedented times.

We have developed a simple practical solution to ensuring staff remain safe and are able to deliver effectively to every business's needs, HR and regulatory risk profiles.

## The cloud-based CovidComply platform:

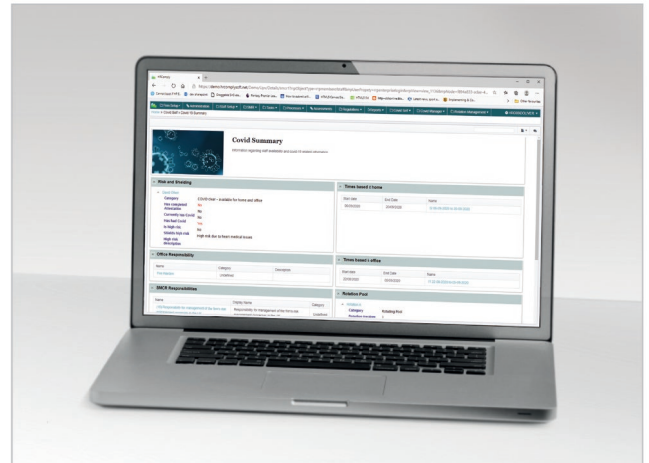

- Manages and keeps track of each Member of Staff's (MOS) Covid status and risks
- Enables staff to manage their own status and submit status change requests
- Oversight and Alerts of all changes for review and approval
- Allows Admins to create work groups based on MOS's Covid risk and status - or on their key responsibilities - or both
- Enables set-up and build of rotas of staff to attend the office/work from home etc
- Rotates these groups through client configurable time periods
- Identifies, tracks and traces newly quarantining staff and their contacts - and alerts others accordingly
- Covers all regulatory and risk responsibilities in the creation of rotas and in-office work groups
- Manages all compliance and HR aspects of return to work guidelines and risks
- Issues updates to policy as required and automates/tracks attestations
- Generates multiple, configurable reports for resource and risk managers
- Aligns with our other modules/platforms and with their regulatory and HR responsibilities and objectives

**Short term and SAAS subscriptions available  
BOGOF – get free trial use of SMRComply or PerformComply when you try  
CovidComply**

**Cloud-based - quick and easy set up and configuration**

Why not take a look at how easily this could be set up in your business and give you complete control over your staff and resource management - their safety and your risks - during the ongoing pandemic crisis and beyond - as home working becomes the norm?

**Book an online demo now.** We can also show you the other modules on the HRComply platform SMRComply, PerformComply etc. - should you be interested.

**// Maximise -  
employee resources  
performance and  
safety**

**Minimise -  
risks! //**

**// COVID19 -Take  
control of the new  
normal!! //**

**HRComply  
People, Performance, Compliance**
